Experience Enhanced Assisted Living Care During Your Short-Term Stay

Respite Assistive Apartments for Seniors

Whether for respite care during an upcoming vacation, for illness recuperation, or in an emergency, know that there is a nurturing place for your loved one and peace of mind for you. This temporary alternative to assisted living level care is now available for stays as short as 30 days for up to 120 days. For those considering assisted living, this is also a great opportunity for a trial stay.

- **Flexible care** when you need it
- Physical, mental, and social **engagement** for your loved one
- **Highest level of safety** with on-site support team
- Freedom of **choice** and individual **customization** with comprehensive care staff
- **Full array of amenities** for convenience and comfort

Come see for yourself how St. John's is helping seniors to embrace life through assisted living care. Call **585-442-1300** to schedule a tour.

Our enhanced assisted living respite apartment is ready to welcome your loved one today!

Enhanced Assisted Living Respite

Short-term respite care with all the comforts of home is now available for caregivers who need enhanced support for their loved one on a limited basis. St. John's has created a specialized apartment within an enhanced assistive care setting that offers the features of at-home living for stays of 30 days or more up to 120 days.

Personalized Care

Our experienced team is trained in the latest advances in assisted living care to support a full breadth of geriatric needs. With customized care plans, high caregiver to resident ratios, and an emphasis on building relationships, residents enjoy improved quality of care and increased satisfaction levels at the Hawthorne.

Safety and Support

Having on-site nursing staff available 24 hours a day and the option to access on-site laboratory services, podiatry assistance, and a physician office, offers residents an additional level of safety and support. Assistance with transfers (not requiring a medical lift), administering injections, medical equipment support, and medication management are also available within this enhanced level of care.

Comforts of Home

With a goal of creating an environment as close to home as possible, we have a silent, resident-wearable call system that minimizes interruptions to daily life. Our spacious, one bedroom respite apartments are wheel-chair accessible and come complete with a kitchenette and walk-in shower. For those requiring this feature, we have a fully-equipped, private bath suite. We also offer fine-level dining three times daily with the option to receive room service and special dietary modifications as required by the Department of Health.

Value-Added Amenities

There is peace of mind in knowing that many value-added benefits are included in the daily rate. Such amenities as transportation to medical and personal appointments; medication assistance by a registered nurse; case management services, an in-house personal emergency response system; cable TV; and weekly housekeeping, are just some of the no-cost benefits offered at St. John's.

Recreational Activities

With full-time social recreation personnel on site, daily activities are planned in partnership with residents, while also providing the option to participate in additional recreation offerings and venues available across St. John's Meadows' beautiful 35-acre community. Whether residents wish to enjoy quiet time in their own apartment or meeting new friends in the many open, public places, there is always something to do at the Hawthorne.
